

ENERGY POLICY

As Çolakoğlu® Metalurji A.Ş. and its employees, our aim in energy management, which is one of the fundamental concepts of our sustainability approach, is to use resources in the most efficient way in our activities and services and to continuously improve our energy performance.

We adopt the following principles based on our purpose.

- To provide the necessary information and resources for the achievement and review of the determined targets,
- To comply with applicable legal and other requirements regarding energy efficiency, energy use, and energy consumption,
- In an integrated way with energy management system and our corporate management system, we continuously monitor and improve the energy performance,
- To prefer energy efficient products, technologies and applications while purchasing products, equipment and services that have a significant impact on energy performance,
- To consider and support opportunities for improving energy performance in the design and revision of production processes,
- We adopt as a principle to carry out studies to raise awareness related to energy efficiency.
